PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 1.5 years of experience building scalable, high-performance web applications. Proficient in React.js, Next.js, and modern JavaScript (ES6+), with strong expertise in REST API integration, server-side rendering (SSR), and responsive UI development. Experienced in developing stock market platforms, banking systems, and digital payment solutions. Adept at delivering user-centric, production-ready applications in agile team environments.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend:	React.js, Next.js (App Router, SSR/SSG), Redux, Tailwind CSS, Bootstrap, Material UI
Backend:	Node.js, Express.js, Django, Django REST Framework
Databases:	MongoDB, PostgreSQL, MySQL
Tools:	Git, GitHub, Postman, VS Code, npm
Concepts:	REST APIs, JWT Authentication, OTP Verification, Responsive Design, Core Web Vitals, Performance Optimization, Real-Time Data Visualization, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer | Rehoboth Digitech Solution

July 2025 – Present

- Built and maintained a full-featured stock market web platform using Next.js (App Router, SSR) and Django REST Framework, serving real-time financial data to end users.
- Integrated Finnhub and financial market APIs to fetch and display real-time stock data with sub-second refresh rates.
- Developed interactive stock charts (candlestick, line, volume) using charting libraries for intuitive financial data visualization.
- Implemented stock watchlist and buy/sell order execution functionality with secure backend transaction handling.
- Developed a secure banking web application featuring JWT-based authentication, account management, and transaction history modules.
- Redesigned and rebuilt the company website in Next.js, achieving significant improvements in Core Web Vitals (LCP, CLS, FID) and SEO performance scores.
- Wrote scalable REST APIs with Django REST Framework and integrated them with Next.js frontend via Axios.

MERN Stack Developer Intern | EY GDS (AICTE Internship)

Dec 2024 – Jan 2025

- Developed responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed and integrated MongoDB schemas for efficient data storage and retrieval.
- Implemented dynamic UI features with React.js hooks and managed application state effectively.
- Collaborated in an agile team environment to deliver scalable, production-ready solutions on schedule.

KEY PROJECTS

Rehoboth Digitech Solution – Website Redesign | *Next.js, Tailwind CSS, Performance Optimization* | rehobothdigitechsolution.com

- Redesigned and rebuilt the official company website from scratch using Next.js, replacing the legacy codebase with a modern, performant architecture.
- Implemented Next.js App Router with SSG and SSR to maximize page load speed and SEO rankings.
- Achieved measurable Core Web Vitals improvements: optimized LCP, reduced CLS, and improved FID scores.
- Applied image optimization using Next.js Image component, lazy loading, and WebP format to reduce asset payload significantly.

- Built fully responsive, mobile-first UI with Tailwind CSS ensuring consistent experience across all devices.

Stock Market Platform | *Next.js, Django, Finnhub API, Redux*

- Built a real-time stock market dashboard supporting stock tracking, watchlists, and trade execution functionality.
- Implemented SSR with Next.js App Router for improved SEO and page load performance.
- Integrated Finnhub API for live market data and developed interactive price visualization charts.
- Secured the application with token-based (JWT) authentication and protected API routes.

Banking Web Application | *Next.js, Django REST Framework, PostgreSQL*

- Developed a secure online banking system with user registration, JWT login, and account management.
- Built a comprehensive transaction handling module including fund transfers and paginated transaction history.
- Designed and exposed RESTful API endpoints using Django REST Framework with proper serialization and validation.

Paytm Wallet Clone | *MongoDB, Express.js, React.js, Node.js (MERN)*

- Developed a digital wallet application supporting UPI-style peer-to-peer money transfers.
- Built filterable transaction history and real-time balance updates using React state management.
- Implemented OTP-based authentication flow to secure user transactions and account access.

EDUCATION

Bachelor of Computer Applications (BCA)

Aug 2022 – Sep 2025

Manipal University Jaipur | CGPA: 8.45 / 10.0

CERTIFICATIONS

- IBM – Frontend Developer Professional Certification
